3.00 TRANSPORTATION / INSTALLATION

3.10 Transportation (From Point to Point)

Strictly comply to the local authority and regulatory on Workplace Safety and Health Control and Measure when moving and transporting of large or heavy equipment. Appropriate material handling machine should be used. **(Risk Assessment applies for Forklift or Pallet Truck Lifting)**

3.20 Bracket Mounting

Model	Bracket Qty (pc)	Bolt & Nuts Size	Bolts Set (pc)
MS-10.10.10DBA180	8	M12 x 15cm	16

Tighten to the pole with Bolt & Nuts Sets

Important Notes:

End User is required to CUSTOM-MAKE the additional supporting bracket and tighten it to the existing Antenna bracket to meet the deployment needs.

3.30 Installation using a crane

Strictly comply to the local authority and regulatory on Workplace Safety and Health Control and Measure when performing lifting of large or heavy equipment, appropriate material handling machine should be used and only certified personnel should perform the task. **(Risk Assessment requirement applies for both Up-Lifting and Down-Lifting.)**

3.31 Lifting the Antenna

The antenna has 4 hook points installed on the top frame (located slightly behind the center of the sphere). These hooks are designed at the center of gravity point of the antenna. A cable, rope can be securely fastened to the hooks and the antenna can be lifted using a crane as pictured below.

3.40 Antenna Installation

With reference to **Item 3.2 Bracket Mounting Procedure**, End user is required to Custom-Make the additional supporting bracket and tighten it to the existing Antenna bracket to meet the deployment needs.

3.41 Antenna Leveling

After the Antenna is mounted to the bracket, it is required to be adjusted to 0° (Zero Degree) with $\leq 0.2^\circ$ on 2 sides of the frame top level. (Rear, Right & Left=As shown in picture)

3.42 Digital Level Gauge Calibration

3.43 Adjustment Requirement
